2.0 EXECUTIVE FORENSIC INTERPRETATION

This artifact represents a deterministic validation of the target AWS Organization's compliance with FTR and SOC2 standards. The multi-regional global sweep identified material 'Fiscal Drift' where abandoned digital assets consume capital with zero organizational utility. Critically, the absence of active CloudTrail anchors and Configuration Recorders creates a 'Forensic Blindspot'. Remediating these vectors immediately optimizes EBITDA and establishes a cryptographically verifiable security posture.
